

Information Security

AdviSec Ltd is an independent consultancy providing a range of services to secure Clients against the threats which arise from operating modern IT system and networks. Such services address the CONFIDENTIALITY, INTEGRITY and AVAILABILITY risks, in a cost effective manner, respecting constraints, supporting legal undertakings, and always ensuring that security solutions do not undermine the Clients' ability to deliver their business objectives.

Advice is provided on a range of corporate architectures and technologies, including fixed and mobile platforms, common IT technologies and 'highly' inter-connected solutions, that pose 'major' challenges involving the need to protect Protectively marked data.

Our consultants are widely respected by both end-user and supplier organisations, and include major Banking and Insurance Companies, Emergency Service clients, and clients from both Central and Local Government. Further details are available on request, including Case Studies, references and testimonials.

Industry Standard accreditations held by staff include CLAS (CESG Listed Advisor Scheme), CISSP, CEH (Certified Ethical Hacker), and ISO 27001 (lead auditor). Additionally, Prince 2, ISO 9001, BS25999 and ITIL certifications are held.

- Secure design: Enabling the application of established and 'leading edge' technology by advising on the design and configuration of suitable security solutions
- Procurement services, including development and negotiation of security, IT service management and Business continuity schedules
- ICT infrastructure security reviews, i.e. gap analysis, penetration testing, network audit and risk assessment
- Developing and implementing strategies for accrediting systems.
- Compliancy and accreditation services, for example with regard to ISO27001, Data Protection Act, Civil Contingencies, PCI DSS and various Codes of Connection (GSI and GCSx, N3, CJX and Airwave)
- Security policy, procedures and awareness/education
- Business Continuity and Disaster Recovery Planning
